BLACK SEA DUTCH STIRRED BY DEMANDS

MALTA, Jan. 19. Orders were received Thursday night for a number of naval vessels to leave Malta apparently for the Black sea. Vice Admiral De Roback sailed Friday aboard the battleship Iron Duke, ac ampanied by the destroyers Seraes and Steadfast, and the steamer Hibiscus. Every other ship avail able is preparing to leave Sunday filled to capacity with stores.

illy Associated Press)

WASHINGTON, Jan. 19.-The air ervice of the United States army has formulated uniform rules of flying for the guidance of its pilots, which no doubt will be the basis of all regulations adopted in the future when flying becomes as common as automobiling.

Some of the precautions prescribed now probably will seem as humorous in that time to come as the speculations and fears concerning motor cars twenty years ago seem to the present generation.

The uniform rules, which superede varying rules made by different commanders during the war, are one step toward standardization of all flying fields. They are diyided into four parts, applicable to hangars, machines, the ground and the air. Some of the more interest ing follows:

"Instructors and students in flyng will not wear a long coat, or bose clothing that might become entangled in the controls, nor will loose articles such as waste or rags that might jam the controls be left in the machine.

Ambulances to be on flying field during all flying hours with a surgeon and necessary medical detail in attendance.

"Do not taxy closer than 100 feet to another ship unless mechanic has hold of wings.

"It is advisable to carry a good pair of cutting pliers in a position where both passengers and pilot can reach them in case of accident. "A fire extinguisher will be carried on each machine.

of a machine is forbidden.

and straight ahead regardless of the University of Nevada. Mr. Curobstacles.

Rules about right of way are for guidance only. Collisions are always vada, having spent the greater part avoidable. There is no right of way. Every pilot must be awake at all fore entering the University of Wislines and prevent his machine from prenam, later going to the University getting dangerously near another of Nevada and completing his studies

"Machines approaching head-oug pass to the right at an interval on at least 200 yards.

"If you see another machine, get out of its way. Do not depend upon the other pilot having seen you. "No vertical banks, steep climb-

ing or sooming will be done under "All acrobacy, such as loops, wing-

spins must be completed at not less

to hown without sufficient attitude . Weather Burekt. in reach a landing place."
